

Floramite® SC Product Guide

Foliar Spray Application

Do-it-Yourself:

Floramite SC® can be easily applied as a foliar spray.

Product Category: Miticide

Active Ingredient: Bifenazate 22.6%

Item #: 302

Unit Size: 1 quart

Unit Treats: 400 - 800 gallons

Product Overview:

Floramite SC® is a spray applied miticide designed to control spider mites in their egg and adult life stages. Mites are significant pests of shade trees and may cause disfiguring growths on trees, as well as dramatically reduce the tree's aesthetic value. Floramite SC® provides quick knockdown through contact activity as well as long lasting residual control.

How do I apply it?

Dilute Floramite SC® in water and apply as a foliar spray using hand or power-operated application equipment (such as portable pump-up or backpack sprayer).

When do I apply it?

Applications of Floramite SC® can be made as soon as mites appear or are present. One application will provide residual control for up to 28 days.

Floramite SC[®] Rate Card

Application Rate:

How much product do I need?

It is important to apply the proper dose to the plant you are treating. Gather the following information to determine the accurate amount of product needed:

1. Determine the type of plant and disease to be treated and verify any application specifications on the product label.

2. Floramite SC[®] is applied as a spray-to-drip application, ensuring the foliage and canopy is thoroughly covered. Determine the quantity and average size of trees you are planning to treat and use the chart below to ensure you have enough product mixed. These are only rough guidelines but can be quite useful for planning your treatments.

Tree Size (DBH)	Gallons per Tree
1"	.5
5"	2 - 4
20"	7 - 13
30"	15 - 20
50"	25 - 30

3. Use the rate chart to determine the total dosage for the plant to be treated.

Note: Use the low rate for preventative applications or where mite infestations are light. The higher rate may be required for heavy infestations or for extended residual control.

Pest	Low Rate	High Rate	Water
Two-spotted spider mite, Pacific mite, strawberry mite, European red mite, citrus red mite, clover mite, southern red mite, spruce spider mite, bamboo spider mite, Lewis mite	1.25 mL 4 fluid ounces	2.5 mL 8 fluid ounces	1 gallon 100 gallons

Tree Geek's mission is to encourage Do-it-Yourselfers who want to care for the health of their trees. We provide:

- Easy-to-use treatments
- Proven results
- Research based science
- Affordable solutions
