

Myclotect™ Product Guide

Foliar Spray Application

Do-it-Yourself:

Myclotect™ can be easily applied as a foliar spray.

Product Category: Fungicide

Active Ingredient: Myclobutanil 19.7%

Item #: 1203

Unit Size: 1 quart

Unit Makes: 400-1600 gallons

Product Overview:

Myclotect™ is a locally systemic fungicide effective on a broad range of common fungal pathogens that may cause unsightly leaf damage, thinning canopies, and a generally weakened and stressed appearance. This stress may also lower the tree's amount of energy, making it more susceptible to other harmful organisms. Myclotect™ protects trees from these pathogens and increases the overall health of trees.

How do I apply it?

Dilute Myclotect™ in water and apply as a foliar spray using hand or power-operated application equipment (such as a portable pump-up or backpack sprayer).

When do I apply it?

Applications can be made in the beginning of the growing season as leaves are emerging. Repeat applications at 10 – 14 day intervals until conditions are no longer favorable.

Myclotect™ Rate Card

Application Rate:

How much product do I need?

It is important to apply the proper dose to the plant you are treating. Gather the following information to determine the accurate amount of product needed:

1. Determine the type of plant and disease to be treated and verify any application specifications on the product label.

2. Myclotect™ is applied as a spray-to-drip application, ensuring the foliage and canopy is thoroughly covered. Determine the quantity and average size of trees you are planning to treat and use the chart below to ensure you have enough product mixed. These are only rough guidelines but can be quite useful for planning your treatments.

Tree Size (DBH)	Gallons per Tree
1"	.5
5"	2 - 4
20"	7 - 13
30"	15 - 20
50"	25 - 30

3. Use the rate chart to determine the total dosage for the plant to be treated.

Note: Under high disease pressure, use the highest rate and the shortest interval for repeat applications. Under low disease pressure, the application interval may be extended.

Disease	Use Site	Myclotect™ Low Rate	Myclotect™ High Rate	Per
Black spot, various leaf spot diseases, powdery mildew, rusts, apple scab, rhizosphera needle cast, various turn diseases, needle diseases	Residential Turf	29.5 mL	71 mL	1000 square feet
	Ornamentals, Shade Trees, Conifers	1.8 mL	3.6 mL	1 gallons
		6 fluid ounces	12 fluid ounces	100 gallons
	Home Orchards: Apples	1.2 mL	1.8 mL	1gallons
		4 fluid ounces	6 fluid ounces	100 gallons
	Home Orchards: Stone Fruits	0.6 mL	0.9 mL	1 gallons
2 fluid ounces		3 fluid ounces	100 gallons	
Home Vineyards: Grapes	1.8 mL	1.0 mL	1 gallons	
	6 fluid ounces	10 fluid ounces	100 gallons	

Tree Geek's mission is to encourage Do-it-Yourselfers who want to care for the health of their trees. We provide:

- Easy-to-use treatments
- Proven results
- Research based science
- Affordable solutions
